Origin of ChatOps

Advantages of ChatOps

Webhooks

- Transfer data over HTTP(s)
- Create triggers based on this data
- Integrate different services
- Methods
 - Get
 - Post

The background of the image is a dark blue gradient with a pattern of falling binary code (0s and 1s) in a lighter blue color, reminiscent of the 'Matrix' digital rain effect. The text 'Demo' is centered in the upper half of the image.

Demo

Webhooks

Demo Summary

- Configure Web Hooks
- Send message using a Webhooks
- PSSlack module
- Web Hooks and Microsoft Teams

Webhooks – Use cases

- Logging
- Share status with team
- Triggered events
- An output stream for code

The background of the image is a dark blue/black field filled with vertical columns of binary code (0s and 1s) in a lighter blue color, creating a 'Matrix' effect. The text is centered horizontally and vertically.

Demo

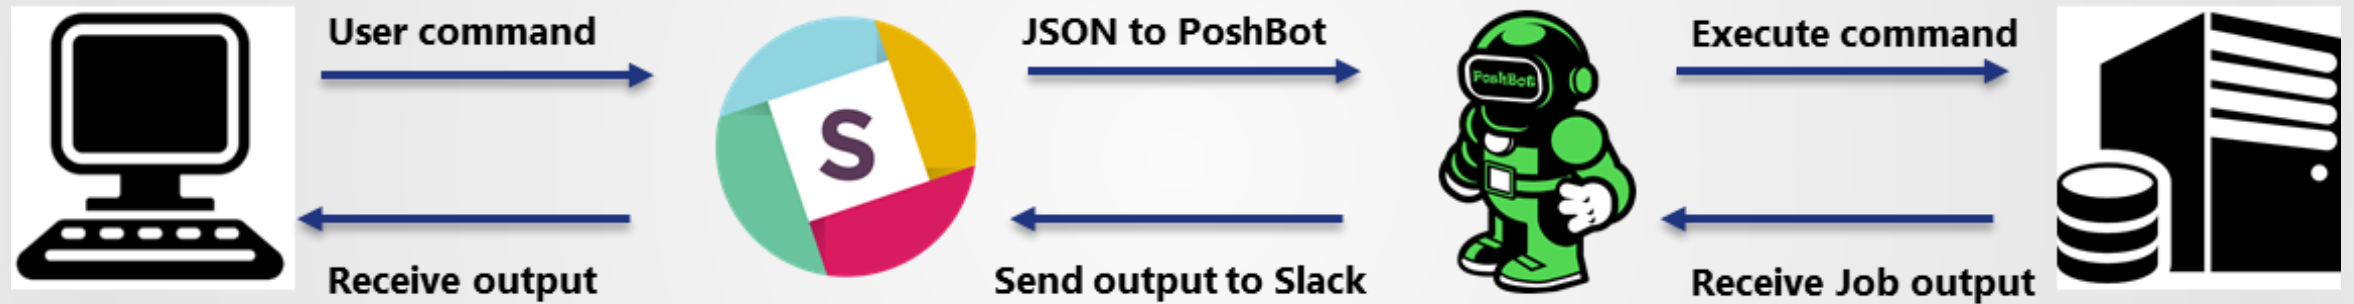

PoshBot - Configuration

Demo Summary

- Created Slack API Token
- Installed PoshBot
- Configured PoshBot
- Showed basic functionality
- Install additional modules

Slack connectivity

The background of the image is a dark blue/black field filled with a dense, vertical stream of white and light blue binary digits (0s and 1s), reminiscent of the 'Matrix' digital rain effect. The digits are slightly blurred and have a soft glow, creating a sense of depth and movement.

Demo

PoshBot - Usecase

Demo Summary

- Check connectivity
- Check diskspace report
- Retrieve events from Eventlog
- Check Service status
- Restart Service
- Restart Machine
- Execute arbitrary code

How to use ChatOps

- Platform for existing scripts
- Central logging location
- Teach-by-example in team chat
- Combine data from multiple sources
- Access from any device
- Distributed teams using central Chat
