Questions

# What are Azure Functions

## Azure Web Apps

#### Advantages of Azure Functions

- Pay for what you use
- No Infrastructure to manage
- No maintenance of servers
- Can be placed in existing Web App subscriptions
- Simplify code writing

#### What problem are we solving?

- Using our scripting skills in the cloud
- Re-using existing code / scripts
- Faster deployment
- Less maintenance

Exploring Azure Functions

- Triggers available
- Scenarios available
- Experimental flag
- How to create Azure Function
- Delete Azure Function

Experimental Language Support: Enabled

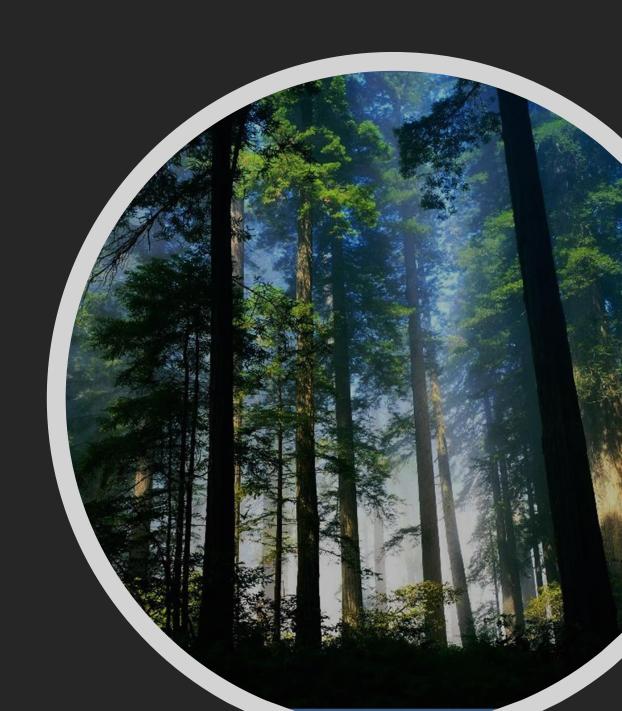

PowerShell language support is still experimental

Create timed function

- Create PowerShell function
- Used cron notation

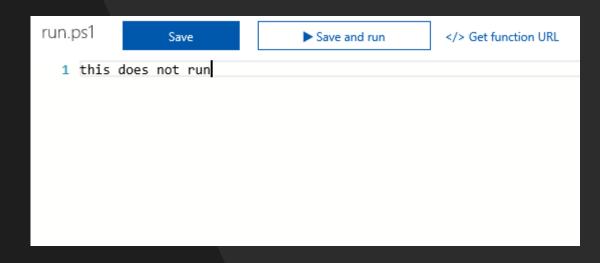

Azure PowerShell Function

- Which PowerShell version
- What variables are defined
- Saw the variables & files
- Reconfigured function.json
- Used Invoke-RestMethod to run

#### Error handling

Invocation log 2 Refresh	
Function	Status
HttpTriggerPowerShell2 (Method: POST, Uri:)	×
HttpTriggerPowerShell2 (Method: POST, Uri:)	×
HttpTriggerPowerShell2 (Method: POST, Uri:)	×

Azure Function Errors

- Had our function fail
- Looked at different error logs
- Fixed the code based on output

#### Writing better code

- Develop code in IDE/ISE
- Use source control
- Run script analyzer for coding practices

Writing Azure Functions

- Different tools
  - ISESteroids
  - VsCode
  - Visual Studio
  - Online Editor
- Write Unit tests for your scripts

#### PowerShell best practices

- Develop code in IDE/ISE
- Use source control
- Run script analyzer for coding practices

#### Summary

- Use existing PowerShell skills
- Develop serverless code
- Interact with other services
- Generous free tier
- functions.azure.com

#### Questions?
