Your Data Center Today

Rubrik Simplifies Your Data Center

Rubrik API set

Powerful

Query, configure, and control nearly all operations across our suite of use cases: backup and recovery, search, analytics, DR, and more.

Native

Gain access to any of the operations that are available through the Rubrik web UI; we use the same RESTful API that you do.

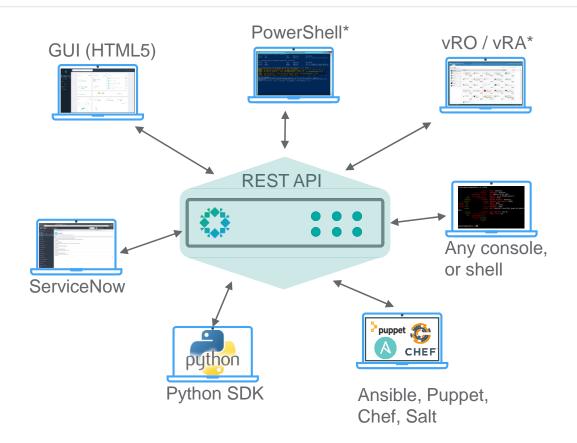

Extensible

Perform bulk-type operations that might otherwise be difficult or impossible to perform by hand.

API – Integrate with anything

Vmware API and SDK

VMware API and SDK Documentation

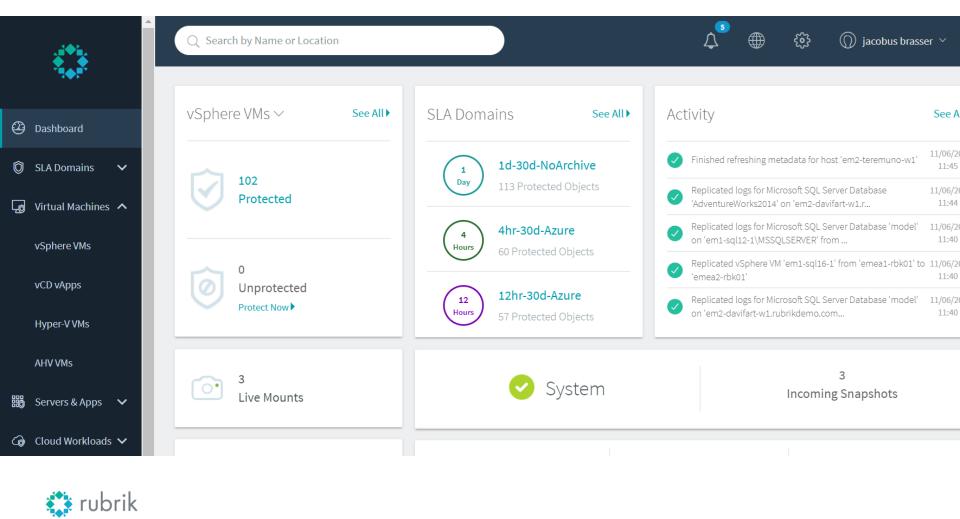

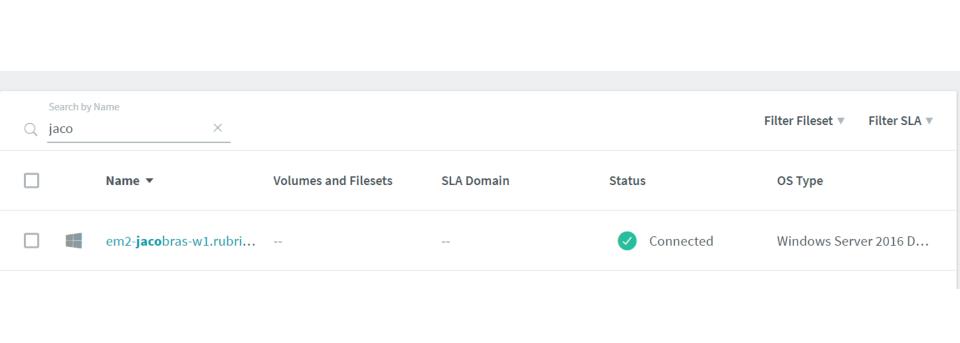

VMware offers release notes, developer guides, API references, and other documentation for current and past versions of API and SDK sets.

You can explore APIs and download SDKs at VMware (code).

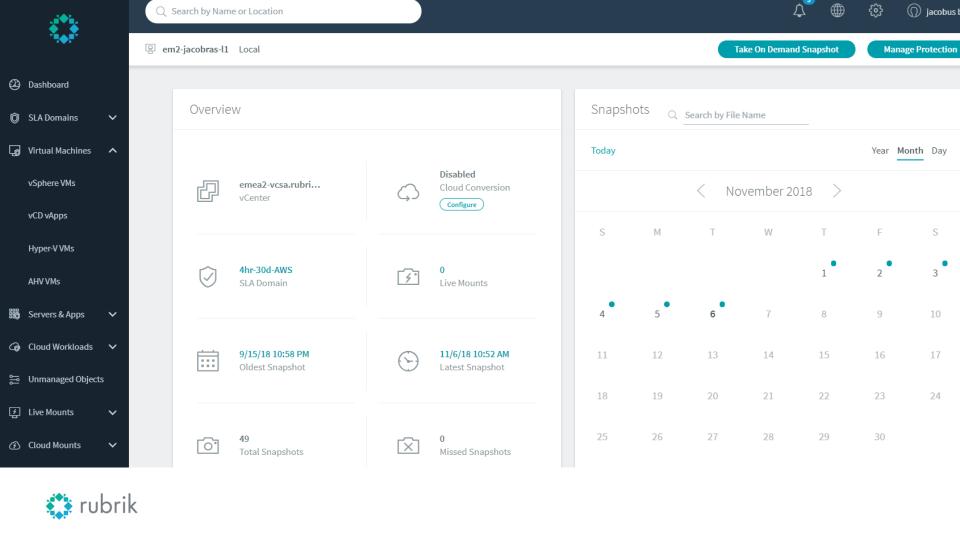

- Infrastructure Management
- Appliances, Backup, and Virtual Disk
- Guest Virtual Machines

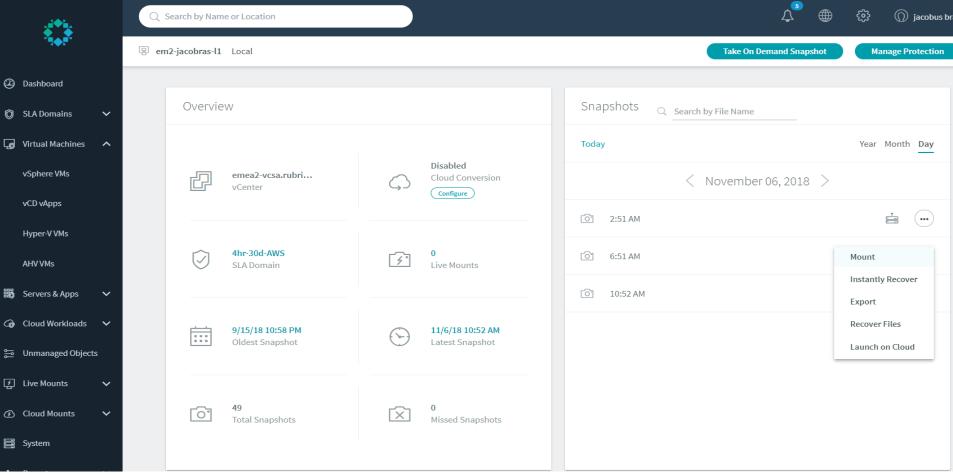

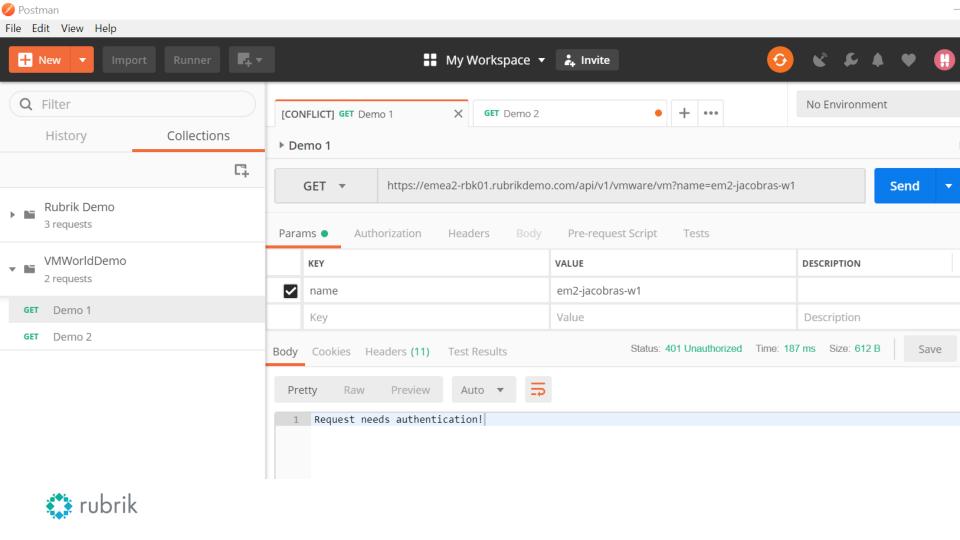

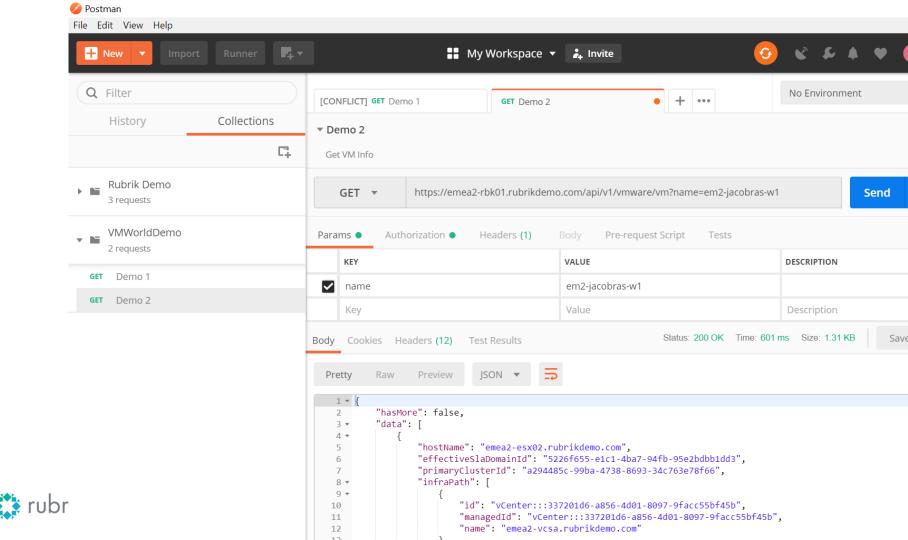

Rubrik REST API

	/cluster : Cluster configuration and health	Show/Hide	List Operations	Expand Operations
	/fileset : File system filesets	Show/Hide	List Operations	Expand Operations
	/fileset_template : File system fileset templates	Show/Hide	List Operations	Expand Operations
	/host : Linux hosts and Windows hosts	Show/Hide	List Operations	Expand Operations
	/Idap_service : LDAP services	Show/Hide	List Operations	Expand Operations
	/mssql : SQL Server instances and databases	Show/Hide	List Operations	Expand Operations
	/session : User session management	Show/Hide	List Operations	Expand Operations
	/sla_domain : SLA Domains	Show/Hide	List Operations	Expand Operations
	/vmware/host : VMware hypervisor hosts	Show/Hide	List Operations	Expand Operations
	/vmware/vcenter : VMware vCenter	Show/Hide	List Operations	Expand Operations
	/vmware/vm : VMware virtual machines	Show/Hide	List Operations	Expand Operations
	GET /vmware/vm			Get list of VMs
	Implementation Notes Get summary of all the VMs			
k	Response Class (Status 200) Virtual machine summary.			0
	Model Example Value
